

## Ontario QSO Party 2010 Results

Congratulations to all the participants. You make our Party! Special kudos to those that did particularly well in their category or from their location. Twenty-eight individuals or Multi-op groups set new records in that regard.

Two new categories were introduced in 2010 and were well supported, with VE3GSI setting the bar for Single Operator Low Power CW from his new QTH and VA3SWG opening the books on Single Operator Low Power Phone. VA3HJ headed down to Norfolk County to provide the first entry from that relatively new County after the separation of Haldimand-Norfolk.

New Category Records are always good news. The biggest numbers this year earned the VE3ZF crew from rarish Manitoulin Island the All-time High Score and Multi-Multi records. VE3EJ pushed the High Power CW mark up scale. As well as the several Ontario stations setting new location scores, two Canadians outside Ontario set new Provincial marks, ten U.S. stations did the same from their respective states and five DX stations did the same from their respective countries.

Again Contest Club Ontario thanks you all for participating!
